

PRESS RELEASE

COMP Cams® V-Thunder® Announces New Harley-Davidson Beehive™ Valve Spring Kit

At COMP Cams®, we learn by testing everything we build, both in the lab and in the field. A perfect example of how this testing program yields beneficial results is the revolutionary Beehive™ valve spring technology that has taken automotive performance enthusiasts by storm. These advanced valve springs provide increased valve train stability and revving capability; now that same technology is available for your Harley-Davidson engine.

Using COMP's Spintron® testing equipment, the #26120 Beehive™ spring was engineered to maximize "harmonic resistance" through reduced mass and unique coil spacing. With highly reduced internal spring harmonics, engines equipped with these state-of-the-art Beehive™ valve springs rev higher and live longer as compared with other "performance" springs. For more information on the COMP Cams® V-Thunder™ high performance valve spring kit or any VThunder™ product contact your local dealer, visit us online at www.vthunder.com or call 1-800-967-1066.

Valve Spring Specifications

Spring # 26120
O.D. 1.095"/1.445"
I.D. .650"/1.00"
155 # @ 1.880" (.600 LIFT)
166 # @ 1.850" (.570 LIFT)
377 # @ 1.280"
Coil Bind 1.230
Spg Rate 370

Quick Summary

Product: VThunder™ Beehive™ Valve Springs
Part Number:

- **#9704-KIT**
#26120-4 Beehive™ valve spring
#745-4 steel retainer
#4696-4 spring seat .570 guide
#600-4 7° lock
- **9705-KIT**
#26120-4 Beehive™ valve spring
#794-4 titanium retainer
#4696-4 spring seat 1.550 O.D. .585 I.D. .060 thick
#618-4 10° .310 Super Lock w/lash cap recess

Features & Benefits:

- Higher RPM capability
- Increased revving capability and valve control
- No rocker box clearance problems
- Engineered to maximize "harmonic resistance"
- Handles spring harmonics throughout a wide RPM band
